EXECUTIVE SUMMARY

Artificial Intelligence & Data Science undergraduate with hands-on experience developing machine learning, NLP, recommendation, RAG, and AI-powered applications. Proficient in Python, data preprocessing, model development and evaluation, with working knowledge of TensorFlow, PyTorch, Sci kit-learn, FAISS, and Generative AI workflows. Built research-oriented projects covering graph-based recommendation, advanced RAG, computer vision, and environmental monitoring, alongside internship and hackathon experience. Seeking opportunities in AI/ML, Data Science, or Software Development.

TECHNICAL SKILLS

Programming Languages: Python, C, Java

AI & Machine Learning: ML , DL , NLP, Artificial Intelligence, Supervised & Unsupervised Learning

ML / DL Frameworks: Scikit-learn, TensorFlow, PyTorch

Data & Visualization: NumPy, Pandas, Matplotlib, Seaborn, Data Analysis, Excel, Power BI

Generative AI : RAG, BM25, Vector Search, BGE Embeddings, CER, FAISS, Llama 3, Ollama

Web & Backend: Flask, Django

Databases & Developer Tools: MongoDB, SQL, Git, GitHub, VS Code, Docker

PROJECTS

GNN Movie Recommender

- Developed a graph-based movie recommendation system using GAT, LightGCN, GraphSAGE and NGCF, integrating FAISS retrieval, attention-based explainability, and ranking evaluation.

Research Paper Explainer – Advanced RAG

- Developed an offline RAG assistant combining BM25 and vector search, BGE embeddings, cross encoder reranking, and Llama 3 through Ollama, with RAGAS evaluation and page-level sources.

RoadSafe CMS – AI Road Safety

- Developed an AI-powered road-damage platform using YOLOv8 detection, severity scoring, embedding-based duplicate detection, geo-tagged heatmaps, and a RAG chatbot.

Cross-Platform Movie Recommendation Extension

- Developed a personalized recommendation engine using watch history, genre, and language preferences to provide cross-platform and explainable recommendations.

AirGuardian – Environmental Monitoring

- Developed a Python-based environmental monitoring project with a structured system workflow and application design for real-world monitoring.

EXPERIENCE

Intern | YBI Foundation

01/2024 – 03/2024

- Contributed to practical projects involving data analysis and machine learning.
- Applied data analysis and machine learning concepts to real-world datasets and model-building tasks.

Intern | IBM

06/2024 – 08/2024

- Completed Full Stack Development training under IBM through the Naan Mudhalvan program.
- Built foundational hands-on experience across front-end and back-end web development.

ACHIEVEMENTS & ACTIVITIES

- **Hackathons & Technical Events:** Participated in 10+ hackathons, technical competitions, and innovation events, collaborating in teams to develop technology-driven solutions and present projects under competitive timelines.
- **Technical Event Leadership:** Led and organized multiple college-level technical events from 2024–2026, serving as Event Lead and Treasurer and overseeing planning, team coordination, budgeting, logistics, and execution.
- **Class Leadership:** Served as Class Representative for four consecutive years, coordinating communication between students and faculty and supporting academic and departmental activities.
- **Institutional Data & Placement Analytics:** Served as the Placement Report & Analysis Head for the entire college, responsible for collecting, organizing, analyzing, and documenting placement data and preparing institutional reports supporting NBA and NAAC accreditation requirements.
- VISA I 2025 (15th International Project Competition) – Exhibited an IoT-Based Smart Onion Storage Project under SDG: Industry, Innovation & Infrastructure.
- IBM Naan Mudhalvan Final Hackathon (**Organized by Tamil Nadu Government**) – Presented an AI-based Employee Performance & Productivity Analysis solution.
- KEC 30-Hour Hackathon – Developed an IoT-Based Smart Onion Storage System during a 30-hour hackathon.
- ITER YX 24-Hours Hackathon – Developed an ATS-based resume system along with a code-to-resume Converter.

EDUCATION

B.Tech – Artificial Intelligence and Data Science

Velammal Institute of Technology – Tamil Nadu

2023 – 2027

CGPA: 8.85 (Up to 6 Sem)

CERTIFICATIONS

- Data Analytics – NoviTech
- International Conference on Data Analytics
- Machine Learning – Udemy
- RBI State Level Quiz Competition – Finalist (Top 20)
- Artificial Intelligence – Udemy
- Full Stack Development – NoviTech
- Design and Analysis of Algorithms – NPTEL (70%)
