EDUCATION

B.Tech: Artificial Intelligence and Data Science, Expected in 01/2027
Velammal Institute of Technology - Tamil Nadu
GPA: 8.8 (Up to 5 Sem)

PROFESSIONAL SUMMARY

Detail-oriented AI & Data Science student with hands-on experience in developing machine learning models for real-world applications. Proficient in Python, data preprocessing, and implementing algorithms for classification and regression tasks. Familiar with deep learning frameworks such as TensorFlow and PyTorch, and experienced in model evaluation and optimization techniques. Seeking an opportunity to apply analytical and technical skills in a dynamic machine learning internship role.

SKILLS

- Python
- C / Java
- NumPy / Pandas
- Scikit-learn
- TensorFlow / PyTorch
- Artificial Intelligence
- Natural Language Processing (NLP)
- Unsupervised Learning (Clustering)
- Git / VS Code / SQL
- PowerBi (Including Formula's)
- Flask / Django
- Matplotlib / Seaborn
- ML / DL
- Data Analysis
- Supervised Learning (Regression, Classification)
- Model Evaluation & Performance Metrics
- GitHub
- MongoDB
- Excel

WORK HISTORY

Intern, 01/2024 - 03/2024

YBI Foundation

- Worked on practical projects related to data analysis and machine learning.
- Gained hands-on experience with real-world datasets and model building.

Intern, 01/2023 - 03/2023

IBM

- Full Stack Development training under IBM through the Naan Mudhalvan program, gaining hands-on experience in front-end and back-end web development.

CERTIFICATIONS

- Design And Analysis of Algorithms, NPTEL, 70%
- International Conference On Data Analytics
- RBI- Competition (State Level)
- Full Stack Development
- Data Analytics, NoviTech
- Machine Learning
- Artificial Intelligence / RAG / Docker

ACHIEVEMENTS ACTIVITIES

- **VISAI 2025 (15th International Project Competition)**, Exhibited IoT-Based Smart Onion Storage Project under SDG: Industry, Innovation & Infrastructure., 02/24/25, Chennai
- **IBM Naan Mudhalvan Final Hackathon**, Presented an AI-based Employee Performance & Productivity Analysis solution., 10/11/25
- **KEC 30-Hour Hackathon**, Developed an IoT-Based Smart Onion Storage System during a 30-hour hackathon., 03/10/25 - 03/11/25
- **ITERYX 24-Hours Hackathon**, Developed complete ATS base
